

INITIATIVES FOR MAKE IN INDIA

We have initiated below mentioned products under Make in India initiative in FY 2020-23.

❑ BoomTower

NewAge Fire Fighting Co. Ltd. was the first Fire Truck manufacturer to introduce Boom Tower Fire Trucks to Indian customers.

The range includes 12 m, 15m, 18m, 20m, 23m and 28 meters.

These towers are very useful for effective firefighting in high rise buildings.

By manufacturing them in India, NewAge provided a cost-effective import substitute thereby making it affordable for smaller fire brigades.

INITIATIVES FOR MAKE IN INDIA

❑ GRP (Glass Reinforced Plastic) Tanks

The greatest issue faced on a Fire Truck is **tank corrosion** and breaking / leaking of tanks.

With the tanks manufactured from GRP, NewAge provides solutions to both the issues on Water Foam Tanks.

GRP being much **stronger yet flexible** compared to steel helps absorb the dynamic forces while the vehicle is in the move.

Being more than **50% lighter** as compared to steel, GRP offers more loading capacity on a fire tender.

NewAge GRP Tanks are warranted for lifetime.
