

LATEST PRODUCT INNOVATIONS

❑ Crew seats

NewAge introduced specialised crew seats recently which had Breathing Apparatus (BA) fitted in the recesses of the backrest.

Saving them precious time, firemen can now be ready with the BA set on their back and would not require getting down from the vehicle, opening the locker and only then donning the BA set.

This saves 4 mins 30 secs for firemen to start the operations.

LATEST PRODUCT INNOVATIONS

❑ Pyrojet fire hose - water curtain hose

This Hose is high performance, high quality, quick & easy to install in use.

Great extinguishing capacity with minimum personnel and versatile in use.

Also, easy to deploy, providing resistance to heat, kinking, abrasion, oils, chemicals, ultraviolet, ozone, de-lamination.
